About MSS Consulting Case Challenge

MSS Consulting Case Challenge 2026 is the **consulting case competition** hosted by MSS FEB UI. This competition is designed to challenge undergraduate students to address real-world business problems with innovative solutions. **Participants will have the opportunity to dive deeper into the consulting industry and gain hands-on experience in solving business challenges**, just like professional consultants.

Competition Grand Theme

REDiscovering: Empowering Inclusive and Sustainable Growth Through Technology

Prize and Benefit

University

1st Place

1

Rp 2.000.000 + Internship
Opportunity at Garuda
Indonesia + Garuda Indonesia
Ticket Voucher Rp 900.000

2

2nd Place

Rp 1.750.000 + E-Voucher Cakap
English Standardized Test (CEST)

3

3rd Place

Rp 1.500.000

High School

1st Place

1

Rp 1.000.000 + Garuda Indonesia
Ticket Voucher Rp 500.000

2

2nd Place

Rp 750.000 + E-Voucher Cakap
English Standardized Test (CEST)

3

3rd Place

Rp 500.000 + E-Voucher Cakap
English Standardized Test (CEST)

Certification

- E-certificate for participating in the competition
- E-certificate for the finalists
- E-Certificate for the winners

Timeline Reminder

Our Case Partner

Carrying the mandate as the nation's flag carrier for seven decade, Garuda Indonesia is committed to continuing its role in connecting the archipelago and bringing the nation's identity to the world stage. With a superior fleet and a service philosophy rooted in local hospitality, Garuda Indonesia currently operates flights to 35 exotic domestic destinations and 14 attractive destinations worldwide.

In its efforts towards continuous transformation to become a dynamic and competitive company, Garuda Indonesia consistently strives to serve the broader public interest. This includes active involvement in humanitarian and environmental missions, synergizing with potential local brands, and implementing sustainable network development to strengthen Indonesian air connectivity and enhance regional economic potential.

Garuda Indonesia adopts AKHLAK as its core values.

These values emphasize integrity, continuous development, respect, dedication, adaptability, and collaboration. They are further reflected in "The Garuda Way" through Because You Matter, I Am in Charge, and I Am with You.

Amanah (Trustworthy)

About Preliminary Round

The participants will be given **15 days (31 August – 14 September 2026)** to **work on the pitch deck and prepare for the final presentation**, considering the time gap between the announcement of the finalists and the final presentation is only 4 day. **The assessment for high school and university categories will be conducted separately**, ensuring fairness and relevance according to each level.

Pitch deck will be submitted via **Google Classroom** under “Preliminary Submission” by **14 September 2026, at 11.59pm**. Please note that **late submissions will not be accepted**, and participants who miss the deadline will not be able to submit their work.

The **top 10 participants for each category** who will advance to the International MSS Consulting Case Challenge 2026 Final Round will be announced through our **Instagram account (@mssfebui)** on **22 September 2026**. All decisions made by the judges are final and non-negotiable.

Pitch Deck Guidelines

Output Requirements

1. Output should be delivered as a Consulting Deck, with a maximum of **15 PPT slides** (excluding cover, references, and appendix)
2. **Language:** English
3. **File name:**
 - **Undergraduates**
 - **Team:** IMCC 2026_Undergraduates_Leader Name_Team Name
 - **Individual:** IMCC 2026_Undergraduates_Individual Name
 - **High School**
 - **Team:** IMCC 2026_High School_Leader Name_Team Name
 - **Individual:** IMCC 2026_High School_Individual Name
4. **File Format:** PDF
5. **Insert Logo:** [Click Here](#)

Participants are strictly prohibited from inserting their institutional logos in the deck.

Deck Content

The deck should include, but is not limited to:

1. Background
2. Comprehensive Analysis
3. Proposed Solutions
4. Implementation
5. Conclusion

Pitch deck will be submitted via Google Classroom under "Preliminary Submission" by 14 September 2026, at 11.59pm. Please note that late submissions will not be accepted, and participants who miss the deadline will not be able to submit their work.

Preliminary Round Scoring Matrix

No	Scoring Category	Criteria	Proportion
1	Key Comprehension	Understanding the main and supporting issues	10%
2	Case Analysis	Utilization of valid and relevant data	15%
		Theory and framework analysis	10%
3	Solutions and Innovations	Practicality and forcefulness of the solutions in tackling main concerns/tasks	20%
		Visionary in potential improvements	10%
		Innovational and visionary solutions	5%
4	Business Acumen	Knowledge: Contextual knowledge, organizational knowledge, financial literacy	8%
		Skill: Self-awareness, stakeholder-awareness	8%
		Ability: Ability to deal with ambiguity, ability to link cause and effect	8%
5	Structure and Arrangement	Compliance with the rules given by the committee	3%
		Writing structure and quality	3%
Total Score			100%

About Final Round

The **online technical meeting for the Final Round** will be held **one day before the Final Presentation Day**, which is on **25 September 2026**

The Final Round will take place on **26 September 2026**, where the top 10 finalists for each category will present their deck to the judges. **Please note that no changes to the deck submitted during the preliminary round are allowed in the final round.**

After a rigorous evaluation process by the judges, the winners of the International MSS Consulting Case Challenge 2026 will be announced at the **Awarding Ceremony** on **26 September 2026**.

Final Round Scoring Matrix

No	Scoring Category	Criteria	Proportion
1	Ideas Delivering	Visualization	5%
		Deck Structure	5%
2	Deck Analysis	Solution-oriented	5%
		Course Readings and Additional Research	10%
		Originality	8%
		Solution Feasibility	12%
		Analysis Method	10%

Final Round Scoring Matrix

3	Team Presentation	Presentation Apportioning	5%
		Appropriate Answers	5%
		Confidence and Mannerism	2%
		Round Regulations	3%
		Pronunciation and Public Speaking	5%
4	Answer Quality (Q&A Session)	Defining Question	7%
		Answer Feasibility	7%
		Evidence-based Answer	6%
		Logical Approach	5%
Total Score			100%

Garuda Indonesia

Winning the Next Generation of Travelers

How can Garuda Indonesia become the preferred full-service airline for Indonesia's next generation of travelers without competing primarily on price?

THE CHALLENGE

Design a commercially viable youth growth strategy that increases Garuda Indonesia's relevance, consideration, and trial among young travelers while preserving its premium full-service positioning.

Background (1/3)

Air travel is becoming increasingly shaped by younger consumers who discover destinations digitally, compare alternatives instantly, expect seamless experiences, and are highly conscious of value. At the same time, the airline market offers customers a wide range of choices across low-cost and full-service models.

Garuda Indonesia has historically competed as Indonesia's national flag carrier and a full-service airline. Its proposition is built around service, hospitality, network connectivity, and the broader travel experience rather than price alone. However, younger travelers may evaluate airlines differently from previous generations: they can be more price-sensitive, digitally influenced, experience-driven, and less attached to traditional airline brands.

Background (2/3)

For **Garuda Indonesia**, the strategic question is therefore not simply how to make the airline appear younger. The larger challenge is how to build relevance early in the customer lifecycle, create reasons for first trial, communicate a compelling premium value proposition, and develop a pathway toward repeat usage and longer-term loyalty.

The company would like to explore how Garuda Indonesia can win a greater share of consideration among university students, first-jobbers, and young professionals while avoiding a strategy that relies primarily on discounting or permanent fare dilution.

Background (3/3)

Strategic Tension:

YOUTH EXPECTATION

Affordable, digital,
flexible, relevant,
shareable

GARUDA POSITIONING

Premium full-service
experience and trusted
national brand

BUSINESS IMPERATIVE

Grow consideration and
trial without competing
mainly on price

Key Definitions/Glossary

Term	Working Definition for This Case
Next-generation travelers	Primarily university students, first-jobbers, and young professionals. Teams may further segment this audience based on needs, behavior, spending power, travel purpose, or life stage.
Full-service airline (FSA/FSC)	An airline model that generally offers a broader service proposition than a low-cost carrier, potentially including bundled service elements, network connectivity, and differentiated customer experience.
Brand consideration	The extent to which a customer would seriously consider Garuda Indonesia when selecting an airline for a relevant trip.
Trial	A first or renewed purchase/use of Garuda Indonesia triggered by a relevant proposition, campaign, product, partnership, or customer experience.
Premium value proposition	The combination of functional and emotional benefits that justifies choosing Garuda Indonesia beyond the lowest available fare.
Price war	A competitive strategy driven mainly by repeated or structural fare reductions rather than differentiated customer value.

Case Objective

Participants are expected to develop an integrated youth growth strategy for Garuda Indonesia that can:

- 1 Identify the most attractive and addressable young-traveler segments for Garuda Indonesia
- 2 Clarify the barriers that prevent these segments from considering or choosing Garuda Indonesia;
- 3 Define a differentiated value proposition that makes Garuda relevant without relying primarily on lower fares;
- 4 Translate the value proposition into actionable product, loyalty, partnership, communication, and/or digital initiatives;
- 5 Demonstrate how the proposed strategy can create measurable customer and business impact.

Scope of Analysis (1/2)

A. Understand the Next-Generation Traveler

- How should Garuda segment university students, first-jobbers, and young professionals beyond age alone?
- Which segments represent the strongest strategic fit based on travel need, future value, willingness to pay, frequency potential, and brand fit?
- What drives airline choice for these customers across awareness, consideration, booking, travel, and post-travel stages?
- What are the main barriers to choosing Garuda Indonesia: price perception, relevance, digital experience, product understanding, schedule/network, brand image, or other factors.

B. Reframe Garuda's Premium Value for Younger Travelers

- What does "premium" mean to young travelers today, and which benefits are truly valued versus merely expected?
- Which Garuda strengths should be protected, amplified, simplified, or reinterpreted for this audience?
- How can Garuda create a stronger value equation without undermining its full-service positioning?
- What should Garuda deliberately avoid doing in order to prevent long-term brand or revenue dilution?

Scope of Analysis (2/2)

C. Design the Youth Growth Proposition

- What integrated proposition should Garuda offer to drive awareness, consideration, first trial, and repeat usage?
- What role should product features, fare bundles, baggage, flexibility, GarudaMiles, payment options, digital experience, campus/community partnerships, KOL/creators, and destination content play?
- Should Garuda create a dedicated youth proposition or embed youth-oriented benefits into the existing brand architecture?
- Which initiatives should be prioritized for a 6-12 month pilot?

D. Build the Implementation Roadmap and Indicative Business Case

- How should Garuda prioritize recommendations based on impact, feasibility, strategic fit, and indicative business value?
- What would the pilot journey look like from design to launch, measurement, learning, and scale-up?
- What key risks should be anticipated, including cannibalization, discount dependency, operational complexity, low adoption, or brand dilution?
- Which KPIs should Garuda use to determine whether the strategy is working?

Quantitative Analysis (1/2)

Participants are encouraged to support their recommendations with relevant quantitative analysis where feasible. Quantitative analysis should strengthen the strategic recommendation, rather than become the main focus of the case. Assumptions should be transparent, evidence-based, and internally consistent.

- Estimate the potential size and attractiveness of the selected youth segment(s) using credible public sources and reasonable assumptions;
- Estimate potential adoption or attractiveness of the proposed proposition using a simple and clearly explained approach;
- Provide a high-level estimate of potential impact where relevant, such as consideration, customer acquisition, repeat usage, passenger volume, or revenue potential;
- Define a focused set of brand, customer, and commercial KPIs that can be measured during the pilot. Detailed financial modelling, NPV/IRR calculations, or a full P&L are not required.

Quantitative Analysis (2/2)

Illustrative KPI Framework

Funnel Stage	Example KPI	Commercial KPI	Learning Question
Awareness	Relevant reach / ad recall	Cost per qualified reach	Are we reaching the intended youth segment?
Consideration	Consideration / intent uplift	Qualified traffic	Does the proposition change airline choice?
Trial	First purchase / redemption	Conversion, CAC, incremental pax	Can awareness convert into real trial?
Repeat / Loyalty	Repeat intent / member activity	Repeat booking, member value	Does the proposition build long-term value?

Supporting Information/Data

- Use Garuda Indonesia's publicly available annual reports, sustainability reports, financial statements, investor disclosures, and official website as primary company references;
- Complement company information with credible government, industry, academic, competitor, travel, and consumer sources;
- Teams may conduct limited primary mini-research, such as interviews or surveys, if useful; methodology and limitations must be clearly disclosed;
- Where information is unavailable, teams may use reasonable assumptions, provided they are clearly identified and justified.

NOTE: No confidential or internal Garuda Indonesia data will be provided as part of this case. Participants are expected to conduct independent research using credible publicly available information. As a publicly listed company, Garuda Indonesia publishes corporate, financial, operational, and sustainability-related information through its official publications and public disclosures.

Suggested Data Sources

- Garuda Indonesia annual reports, sustainability reports, investor disclosures, and official website;
- Indonesia Ministry of Transportation / Directorate General of Civil Aviation publications;
- Statistics Indonesia (BPS) and Ministry of Tourism publications;
- IATA, ICAO, and other credible aviation-industry publications;
- Academic journals and reputable consumer / travel research;
- Public information from relevant airline, OTA, loyalty, fintech, travel, and lifestyle benchmarks;
- Primary mini-research conducted independently by teams (optional), provided the methodology and limitations are clearly disclosed.

Expected Output & General Case Characteristics (1/2)

Teams should present a recommendation that is **strategic, evidence-based, commercially grounded, and actionable**. There is **no single correct answer**.

Expected Output	Minimum Expectation
Executive recommendation	A clear strategic choice, not only a list of ideas.
Target segment & insight	Priority segment(s), needs, barriers, and evidence supporting the choice.
Value proposition	A differentiated proposition explaining why young travelers should choose Garuda.
Strategic initiatives	A coherent set of prioritized initiatives across product, loyalty, partnership, digital, and communication as relevant.

Expected Output & General Case Characteristics (2/2)

Teams should present a recommendation that is **strategic, evidence-based, commercially grounded, and actionable**. There is **no single correct answer**.

Expected Output	Minimum Expectation
Indicative opportunity & impact	High-level segment sizing and directional impact estimates supported by transparent assumptions. Detailed financial modelling is not required.
Implementation roadmap	Pilot scope, sequencing, key owners/enablers, risks, and mitigation.
Measurement framework	Brand, funnel, commercial, and learning KPIs.
Sources & assumptions	Credible references and explicit separation between evidence, assumptions, and team judgment.

FINAL CHALLENGE

Build a youth growth strategy that makes Garuda Indonesia more relevant and more frequently considered by the next generation – not by becoming the cheapest airline, but by becoming the airline whose value they understand and want to experience.
